

The Fund

The Fund aims to have both a prospective yield at least 1.1 times that of the Asia Pacific ex-Japan markets and to deliver long-term capital appreciation. Mark Williams and Carolyn Chan aim to achieve this through a four-stage investment process – identifying the key drivers for Asia Pacific (ex-Japan) equities, incorporating these into a framework to determine the likely beneficiaries and losers of these drivers, fundamental stock analysis to identify individual companies and portfolio construction. For full investment objective and policy details please refer to the Prospectus.

Key risks: Past performance is not a guide to future performance. Investment in the Fund carries the risk of potential total loss of capital. Investment in the Fund involves a foreign currency and may be subject to fluctuations in value due to movements in exchange rates. Discrete performance data is not available for five full 12 month periods due to the launch date of the portfolio. Investment decisions should not be based on short term performance.

*Historic yield: reflects distributions declared over the past 12 months as a percentage of the mid-market unit price. It does not include any preliminary charge and investors may be subject to tax on their distributions.
