Key risks: Past performance is not a guide to future performance. Investment in the Fund carries the risk of potential total loss of capital. A proportion of the portfolio is invested in smaller companies and companies traded on the Alternative Investment Market. These stocks may be less liquid and the price swings greater than those in, for example, larger companies. Investment decisions should not be based on short-term performance.

*The fraction of a fund invested differently to its benchmark. A 100% active share is a fund with no holdings in the benchmark, a 0% active share is a fund identical to the benchmark.
