

Stephen Bailey & Jamie Clark

The Fund

The Fund seeks to provide a rising level of income along with capital growth through investing predominantly in the UK, with some exposure to international companies, and using the Macro-Thematic process, which can lead to sector exposures being significantly different from those of the market and many of its sector's peers. Stephen Bailey and Jamie Clark believe that macro-thematic analysis – the identification and interpretation of major economic, political and social developments affecting the UK and the rest of the world – offers scope to add long-term investment value. For full investment objective and policy details please refer to the Prospectus.

Key risks: Past performance is not a guide to future performance. Investment in the Fund carries the risk of potential total loss of capital. Investment in the Fund involves a foreign currency and may be subject to fluctuations in value due to movements in exchange rates. The Fund's expenses are charged to capital. This has the effect of increasing the distribution and constraining the Fund's capital performance. Investment decisions should not be based on short-term performance.

^{^^}The amount of income generated for distribution after deducting all expenses. ^{*}The fraction of a fund invested differently to its benchmark. A 100% active share is a fund with no holdings in the benchmark, a 0% active share is a fund identical to the benchmark.
