As the share class has been in existence for less than one discrete year as at the previous quarter end, there is insufficient data to provide an indication of past performance.

Key risks: Past performance is not a guide to future performance. Investment in the Fund involves foreign currencies and may be subject to fluctuations in value due to movements in exchange rates. The value of fixed income securities will fall if the issuer is unable to repay its debt or has its credit rating reduced. Generally, the higher the perceived credit risk of the issuer, the higher the rate of interest. Bond markets may be subject to reduced liquidity. The Fund may invest in emerging markets/soft currencies or in financial derivative instruments, both of which may have the effect of increasing volatility. Discrete performance data is not available for five full 12 month periods due to the launch date of the portfolio.
