As the share class has been in existence for less than one discrete year as at the previous quarter end, there is insufficient data to provide an indication of past performance.

Key risks: Past performance is not a guide to future performance. Investment in the Fund involves foreign currencies and may be subject to fluctuations in value due to movements in exchange rates. The Fund may invest in emerging markets/soft currencies or in financial derivative instruments, both of which may have the effect of increasing volatility. The Fund holds a concentrated portfolio of stocks, if the price of one of these stocks should move significantly, this may have a notable effect on the value of the portfolio. Discrete performance data is not available for five full 12 month periods due to the launch date of the portfolio.

^{*}The fraction of a fund invested differently to its benchmark. A 100% active share is a fund with no holdings in the benchmark, a 0% active share is a fund identical to the benchmark.

Please note that on 7 August 2019 the benchmark was changed from the MSCI Russia Large Cap Index to the MSCI Russia 10-40 Index. The MSCI Russia 10-40 Index launched on 31 May 2006. The since launch performance for the benchmark therefore consists of the MSCI Russia Large Cap Index until 30 May 2006 and the MSCI Russia 10-40 Index from 31 May 2006.
