

LIONTRUST

SUSTAINABLE FUTURE MANAGED FUND

KEY INVESTOR
INFORMATION
DOCUMENT

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Liontrust Sustainable Future Managed Fund is a sub-fund of the Liontrust Sustainable Future ICVC and categorised as a UCITS scheme. This document is based upon Retail class units (2 Inc Class) (ISIN: GB0030030398). This Fund is managed by Liontrust Fund Partners LLP, a subsidiary of Liontrust Asset Management PLC.

Objective

- The Fund aims to deliver income and capital growth over the long term (5 years or more).

Policy

- The Fund will invest globally. All investments will be expected to conform to our social and environmental criteria as set out on the Liontrust website (liontrust.co.uk).
- Allocations to equities, fixed income, and cash will vary over time depending on market circumstances. Asset allocation limits will remain in line with the IA Mixed Investments (40-85% shares) Sector.
- Asset allocation ranges:
 - Equity – 60-85%
 - Fixed income – 10-40%
 - Cash – 0-10%
- The Fund may invest in collective investment schemes including other Liontrust Funds (up to 10% of Fund assets), other transferable securities, money market instruments, warrants, deposits.
- The Fund is permitted to use derivatives for the purposes of efficient portfolio management and for investment purposes.

Recommendation

- This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

How to buy

- You may buy or sell shares on a daily basis (but not weekends or Bank Holidays). Orders must be received by 11:59am for execution at 12:00 midday valuation point on the same day. Further details can be found at www.liontrust.co.uk.

Investment process

- The Fund can invest in equities, bonds and cash.
- For equities, the process starts with a thematic approach in identifying the key structural trends that will shape the global economy of the future. We currently invest in three transformative trends (Better Resource Efficiency, Improved Health and Greater Safety and Resilience) and 20 themes within these. The team then invests in well-run companies whose products and operations capitalise on these transformative changes.
- While themes are at the heart of idea generation, there are three further criteria all holdings have to satisfy:
 - Broader sustainability: While a company might have significant exposure to a theme, the team has to check how sustainable the rest of its activities are.
 - Business fundamentals: The team assesses a company's ability to generate high returns on equity.
 - Financial modelling and valuation: This information is used to construct financial models detailing the revenue, margin and earnings progression the company is likely to deliver over the next five years.
- For the fixed income process, macroeconomic analysis determines the managers' top-down view of the world and this helps shape portfolio construction and appetite for risk. After this, the managers aim to focus on high-quality issuers and believe this can reduce bond specific risk. Assessment of quality is a distinctive part of their process, combining traditional credit analysis with a detailed sustainability assessment based on their proprietary model.
- The managers seek the best-value bonds from high-quality issuers across the capital structure, along the maturity curve and issued in primary credit markets (UK, US and Europe).
- The Fund's asset allocation is based on long-term risk/return profiles of equities, bonds and cash. The managers then tactically adjust these exposures within predefined ranges to enhance overall investment returns. Tactical positioning is driven by analysis of leading economic indicators and then an assessment of asset class valuations relative to both their own history and to each other.

Risk and reward profile

- This Synthetic Risk and Reward Indicator (SRRI) is based on historical data and may not be relied upon to gauge the future risk profile of the Fund.
- The SRRI shown is not guaranteed to remain the same and may shift over time.
- The lowest category (1) does not mean 'risk free'.
- The Fund's risk and reward category has been calculated using the methodology set by the European Commission. It is based upon the rate by which the Fund or a representative fund or index's value has moved up and down in the past.
- The Fund is categorised 4 primarily because of its exposure to a diversified portfolio of equities and debt instruments.
- The SRRI may not fully take into account the following risks:
 - that a company may fail thus reducing its value within the Fund;
 - any company which has high overseas earnings may carry a higher currency risk;
 - any overseas investments may carry a higher currency risk. They are valued by reference to their local currency which may move up or down when compared to the currency of the Fund.
- Fluctuations in interest rates are likely to affect the value of the bonds and other fixed-interest securities held by the Fund. If long-term interest rates rise, the value of your shares is likely to fall.
- The Fund can invest in derivatives. Derivatives are used to protect against currencies, credit and interest rates move or for investment purposes. There is a risk that losses could be made on derivative positions or that the counterparties could fail to complete on transactions.
- Investments in emerging markets may involve a higher element of risk due

to less well regulated markets and political and economic instability.

LIONTRUST

SUSTAINABLE FUTURE MANAGED FUND

Charges for this fund

- The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
