

LIONTRUST

GF HIGH YIELD BOND FUND

KEY INVESTOR
INFORMATION
DOCUMENT

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Liontrust GF High Yield Bond Fund is a sub-fund of Liontrust Global Funds plc. This document is based upon the B1 USD Accumulating share class (ISIN: IE00BFXZFF67), which is the representative class for all other classes.

Objective

- The Fund aims to maximise the returns on your investment through a combination of income and capital growth, through investment in the global fixed income market.

Policy

- The Fund invests at least 50% of its assets in high yield bonds (i.e. bonds classified as below investment grade) issued by companies worldwide which are denominated in US Dollar or non-US Dollar bonds that are hedged back into US Dollar.
- Although the focus is on high yield corporate bonds, the Fund may also invest in investment grade corporate bonds, government bonds, cash or assets that can be turned into cash quickly.
- The Fund invests in developed and emerging markets, with a maximum of 20% of its net assets invested in emerging markets.
- Where the Fund invests in non-US Dollar assets, the currency exposure of these investments will generally be hedged back to US Dollar. Up to 5% of the Fund's currency exposure may not be hedged (i.e. the Fund may be exposed to the risks of investing in another currency for up to 5% of its assets).
- The Fund may invest both directly, and through the use of derivatives. The use of derivatives may generate market leverage (i.e. where the Fund takes market exposure in excess of the value of its assets).
- The Fund has both Hedged and Unhedged share classes available. The Hedged share classes use forward foreign exchange contracts to protect returns in the base currency of the Fund.

Recommendation

- This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

How to buy

- You may buy or sell shares on a daily basis (but not weekends or Bank Holidays). Orders must be received by 11.59a.m. (Irish time) for execution at midday valuation point.

Investment process

- The fund manager decides which investments to hold in the Fund based on an assessment of a combination of macroeconomic, asset, sector and individual investment level factors.
- Before being selected, an assessment is made of the creditworthiness of each potential investment (i.e. the likelihood of the companies issuing the bonds being able to meet the coupon payments or pay back the capital of the bond on maturity).
- A number of other factors are also considered, such as expected total return relative to the assessed risk, duration and liquidity.

Risk and reward profile

- This Synthetic Risk and Reward Indicator (SRRRI) is based on historical data and may not be relied upon to gauge the future risk profile of the Fund.
- The SRRRI shown is not guaranteed to remain the same and may shift over time.
- The lowest category (1) does not mean 'risk free'.
- The Fund's risk and reward category has been calculated using the methodology set by the European Commission. It is based upon the higher of the actual historical annualised volatility and the translated annualised volatility of the Fund based upon the internal Value at Risk limit.
- The Fund is categorised 4 primarily for its exposure to a diversified portfolio of debt instruments along with a number of derivative positions.
- The SRRRI may not fully take into account the following risks:
 - Bonds are affected by changes in interest rates and their value and the income they generate can rise or fall as a result.
 - The creditworthiness of a bond issuer may also affect that bond's value. Bonds that produce a higher level of income usually also carry greater risk as such bond issuers may have difficulty in paying their debts. The value of a bond would be significantly affected if the issuer either refused to pay or was unable to pay.
- The Fund can invest in derivatives. Derivatives are used to protect against currency, credit or interest rate moves or for investment purposes. There is a risk that losses could be made on derivative positions or that the counterparties could fail to complete on transactions.
- The Fund has both Hedged and Unhedged share classes available. The Hedged share classes use forward foreign exchange contracts to protect returns in the base currency of the Fund.
- The Fund invests in emerging markets which carries a higher risk than investment in more developed countries. This may result in higher volatility and larger drops in the value of the fund over the short term.
- Counterparty risk: any derivative contract, including FX hedging, may be at risk if the counterparty fails.
- For full details of the Fund's risks, please see the prospectus which may be obtained from Liontrust (address overleaf) or online at www.liontrust.co.uk.

LIONTRUST

GF HIGH YIELD BOND FUND

Charges for this fund

- The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

	Classes A5 Acc, B5 Acc, C5 Acc: 0.67%
	Classes B8 Acc, C8 Inc: 0.47%

Charges taken from the Fund under certain specific circumstances

Performance fee	None
-----------------	------

Past performance

- Past performance is not a guide to future performance. It has been calculated on the basis that any distributable income of the Fund has been reinvested. The past performance shown in the chart takes into account all charges except entry and exit charges.
- The Fund launched on 08 June 2018.
- The B1 Acc share class was launched on 08 June 2018.
- The base currency of the Fund is US dollars.
- The Fund is considered to be actively managed in reference to the benchmark(s) in the performance table by virtue of the fact that it uses the benchmark(s) for performance comparison purposes. The benchmark(s) are not used to define the portfolio composition of the Fund and the Fund may be wholly invested in securities which are not constituents of the benchmark.
