The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Liontrust GF Sustainable Future Global Growth Fund is a sub-fund of Liontrust Global Funds plc. This document is based upon the A5 EUR Accumulating share class (ISIN: IE00BK6SH280).

### Objective

- The Fund aims to achieve capital growth over the long term (five years or more) through investment in sustainable securities, predominantly consisting of global equities.

### Policy

- The Fund is considered to be actively managed in reference to MSCI World (the "Benchmark") by virtue of the fact that it uses the Benchmark for performance comparison purposes. Some of the Fund's securities may be components of and may have similar weightings to the Benchmark. However the Benchmark is not used to define the portfolio composition of the Fund or as a performance target and the Fund may be wholly invested in securities which are not constituents of the Benchmark.
- Typically at least 90% of the Fund will be invested in the shares of global companies, with up to 10% in bonds and cash.
- The Fund will only invest in companies that meet defined ethical considerations and will benefit from improvements in environmental standards and a shift towards a more sustainable economic system.
- While the Fund will invest predominantly in companies from developed markets it may also invest up to 20% in emerging market securities.
- In normal conditions, the Fund will aim to hold a diversified portfolio, although at times the Investment Adviser may decide to hold a more concentrated portfolio, and it is possible that a substantial portion of the Fund could be invested in cash or cash equivalents.
- The Fund is not expected to have any exposure to derivatives (contracts whose value is linked to the expected future price movements of an underlying asset) in normal circumstances but may on occasion use them for investment, efficient portfolio management and for hedging purposes including gaining exposure to financial indices.
- Any income from the Fund's investments may either be paid to you or reinvested in the Fund. For the A5 EUR Accumulating class, any income will be reinvested.

### Recommendation

- This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

### How to buy

- You may buy or sell shares on a daily basis (but not weekends or Bank Holidays). Orders must be received by 11.59a.m. (Irish time) for execution at midnight valuation point. Further details can be found at [www.liontrust.co.uk](http://www.liontrust.co.uk).

### Investment process

- The process starts with a thematic approach in identifying the key structural trends that will shape the global economy of the future. We currently invest in three transformative trends (Better Resource Efficiency; Improved Health; and Greater Safety and Resilience) and 20 themes within these trends such as technological and medical advancements.
- The team then invests in well run companies whose products and operations capitalise on these transformative changes.
- While themes are at the heart of the investment idea generation, there are three further criteria all potential holdings have to satisfy:
  - Broader sustainability of the company: While a company might have significant exposure to a theme, the team has to check how sustainable the rest of its activities are.
  - Business fundamentals: The team assesses a company's ability to generate high returns on equity. This includes analysis of the competitive dynamics facing the business and the resilience of its advantages versus competitors.
  - Financial modelling and valuation assessment: This information is used to construct financial models detailing the revenue, margin and earnings progression the company is likely to deliver over the next five years.
- Among the team's key differentiators is the fact that all the sustainable elements are integrated within a single team. Every team member is responsible for all aspects of financial and ESG relating to an investment decision. This means the team engages with companies across a broad range of issues relating to stages in their process, including screening criteria, sustainable investment themes and company specific ESG issues.

### Risk and reward profile

obtained from Liontrust (address overleaf) or online at [www.liontrust.co.uk](http://www.liontrust.co.uk).

- This Synthetic Risk and Reward Indicator (SRRI) is based on historical data and may not be relied upon to gauge the future risk profile of the Fund.
- The SRRI shown is not guaranteed to remain the same and may shift over time.
- The lowest category (1) does not mean 'risk free'.
- The Fund's risk and reward category has been calculated using the methodology set by the European Commission. It is based upon the rate by which the Fund or a representative fund or index's value has moved up and down in the past.
- The Fund is categorised 6 primarily due to its exposure to global equities.
- The SRRI may not fully take into account the following risks:
  - that a company may fail thus reducing its value within the Fund;
  - any company which has high overseas earnings may carry a higher currency risk;
  - overseas investments may carry a higher currency risk. They are valued by reference to their local currency which may move up or down when compared to the currency of the Fund.
- The Fund may, under certain circumstances, make use of derivative instruments but it is not intended that their use will materially affect volatility.
- Fluctuations in interest rates are likely to affect the value of the bonds and other fixed-interest securities held by the Fund. If long-term interest rates rise, the value of your shares is likely to fall.
- Counterparty risk: any derivative contract, including FX hedging, may be at risk if the counterparty fails.
