

KEY INVESTOR
INFORMATION
DOCUMENT

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Liontrust GF Sustainable Future European Corporate Bond Fund is a sub-fund of Liontrust Global Funds plc. This document is based upon the A1 EUR Accumulating share class (ISIN: IE00BYWSTD52), which is the representative class for all other classes.

Objective

- The Fund aims to maximise the returns on your investment through a combination of income and capital growth, through investment in the European fixed income market.

Policy

- The Fund invests at least 80% of its assets in bonds issued by companies which are denominated in Euro or non-Euro corporate bonds that are hedged back into Euros.
- The focus is on investment grade corporate bonds (i.e. those which meet a specified level of creditworthiness).
- The Fund invests in companies that provide or produce more sustainable products and services as well as having a more progressive approach to the management of environmental, social and governance (ESG) issues.
- Although the focus is on investment grade corporate bonds, the Fund may also invest in government bonds, high yield bonds, cash or assets that can be turned into cash quickly.
- Where the Fund invests in non-Euro assets, the currency exposure of these investments will generally be hedged back to Euro. Up to 10% of the Fund's currency exposure may not be hedged, i.e. the Fund may be exposed to the risks of investing in another currency for up to 10% of its assets.
- The Fund may invest both directly, and through the use of derivatives. The use of derivatives may generate market leverage (i.e. where the Fund takes market exposure in excess of the value of its assets).

Recommendation

- This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

How to buy

- You may buy or sell shares on a daily basis (but not weekends or Bank Holidays). Orders must be received by 11.59a.m. (Irish time) for execution at midnight valuation point.

Investment process

- The focus of the Fund is on sustainable investments in corporate bonds issued by companies that meet the ESG criteria.
- The fund manager decides which investments to hold in the fund based on an assessment of a combination of macroeconomic, asset, sector and individual investment level factors.
- Before being selected for the portfolio, a number of factors are considered for each investment, such as whether the investment meets the ESG requirements, expected total return relative to the assessed risk, duration and sustainability of cash flows.
- Further details may be found in the prospectus and information on the investment process may be found at www.liontrust.co.uk.

Risk and reward profile

- This Synthetic Risk and Reward Indicator (SRRI) is based on historical data and may not be relied upon to gauge the future risk profile of the Fund.
- The SRRI shown is not guaranteed to remain the same and may shift over time.
- The lowest category (1) does not mean 'risk free'.
- The Fund's risk and reward category has been calculated using the methodology set by the European Commission. It is based upon the higher of the actual historical annualised volatility and the translated annualised volatility of the Fund based upon the internal Value at Risk limit.
- The Fund is categorised 4 primarily for its exposure to a diversified portfolio of debt instruments along with a number of derivative positions.
- The SRRI may not fully take into account the following risks:
 - Bonds are affected by changes in interest rates and their value and the income they generate can rise or fall as a result.
 - The creditworthiness of a bond issuer may also affect that bond's value. Bonds that produce a higher level of income usually also carry greater risk as such bond issuers may have difficulty in paying their debts. The value of a bond would be significantly affected if the issuer either refused to pay or was unable to pay.
- The Fund can invest in derivatives. Derivatives are used to protect against currency, credit or interest rate moves or for investment purposes. There is a risk that losses could be made on derivative positions or that the counterparties could fail to complete on transactions.
- The Fund has both Hedged and Unhedged unit classes available. The Hedged unit classes use forward foreign exchange contracts to protect returns in the base currency of the Fund.
- Counterparty risk: any derivative contract, including FX hedging, may be at risk if the counterparty fails.
- For full details of the Fund's risks, please see the prospectus which may be obtained from Liontrust (address overleaf) or online at www.liontrust.co.uk.

GF SUSTAINABLE FUTURE EUROPEAN CORPORATE BOND FUND

Charges for this fund

- The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
